Data

Evolving data insights and the data platform

Seamless integration with Office 365 and Azure

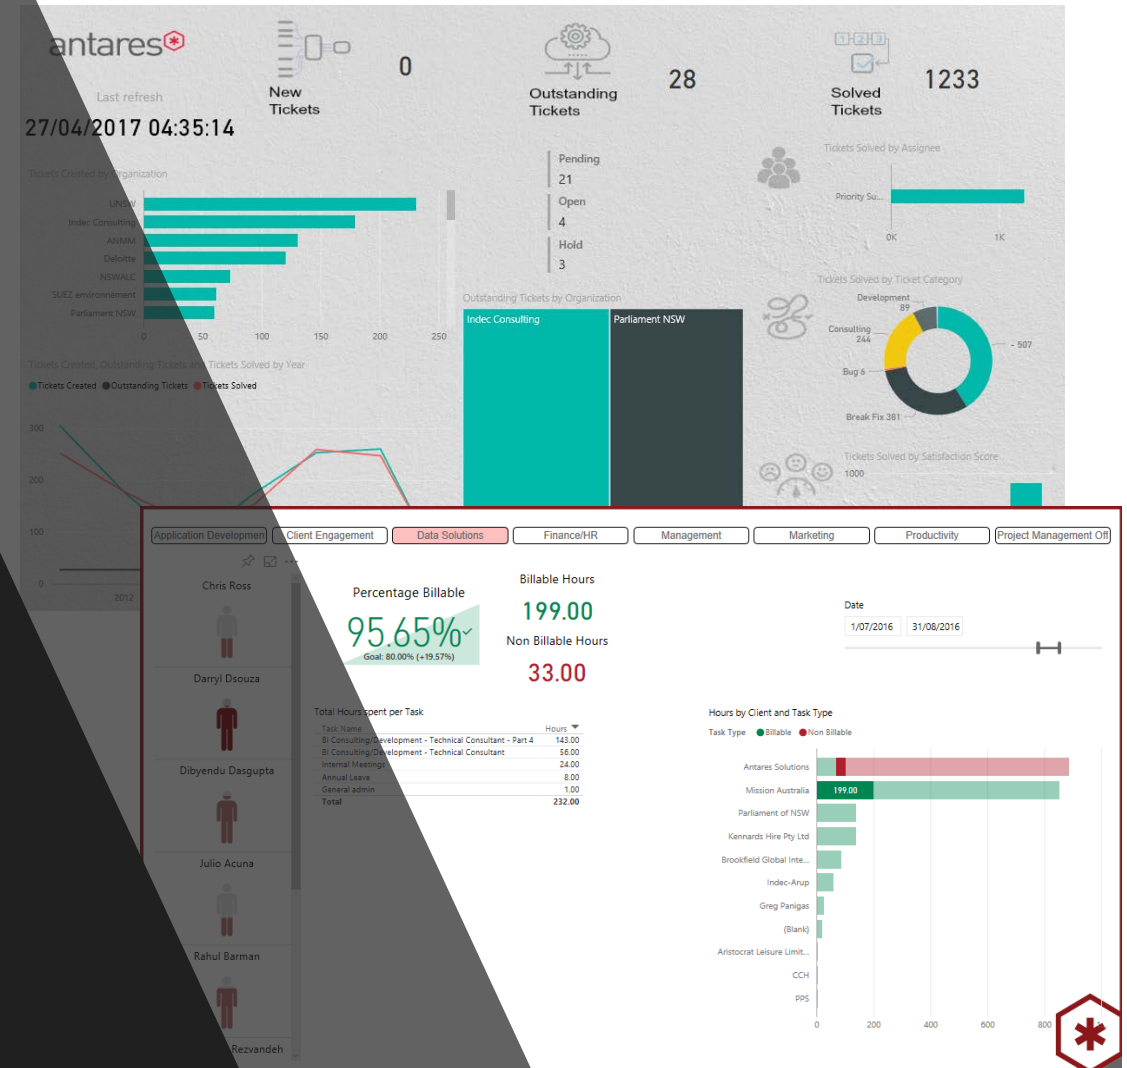

- ➔ Team collaboration through support for Office 365 Groups
- ➔ Seamless navigation to other workloads in Office 365 and Azure
- ➔ Use Excel data and pin live charts to your Power BI dashboards
- ➔ View Excel spreadsheets through support for Excel Online

THE VALUE OF POWER BI

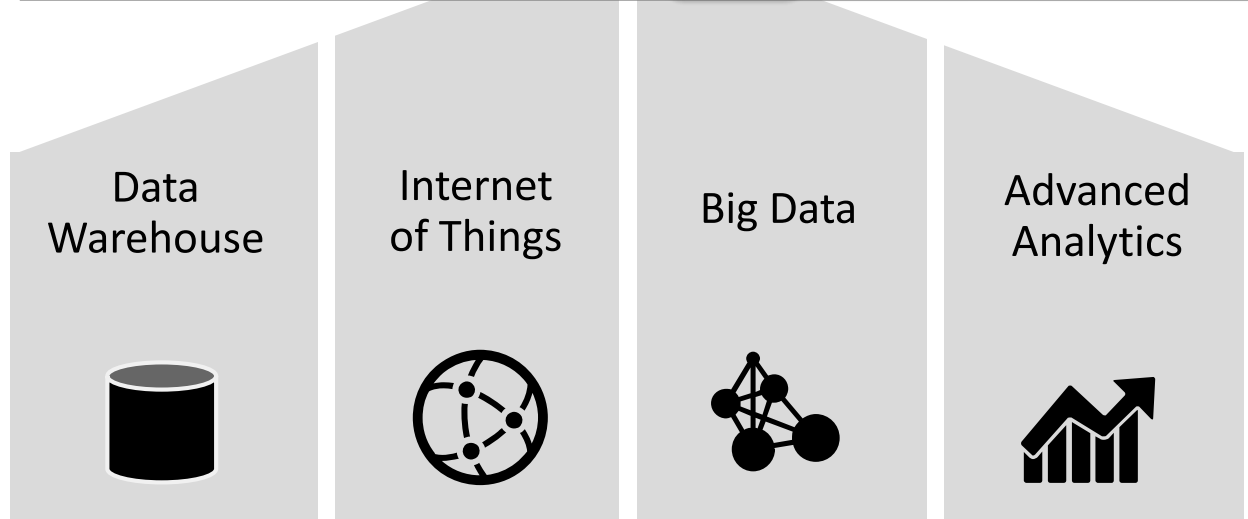

The Value of Power BI: A Personal Experience

OTHER APPLICATIONS OF POWER BI

Seamless integration across the Microsoft Data Platform provides quicker and more cost effective deployment for any data project

NEXT STEPS FOR POWER BI

ARCHITECTURE

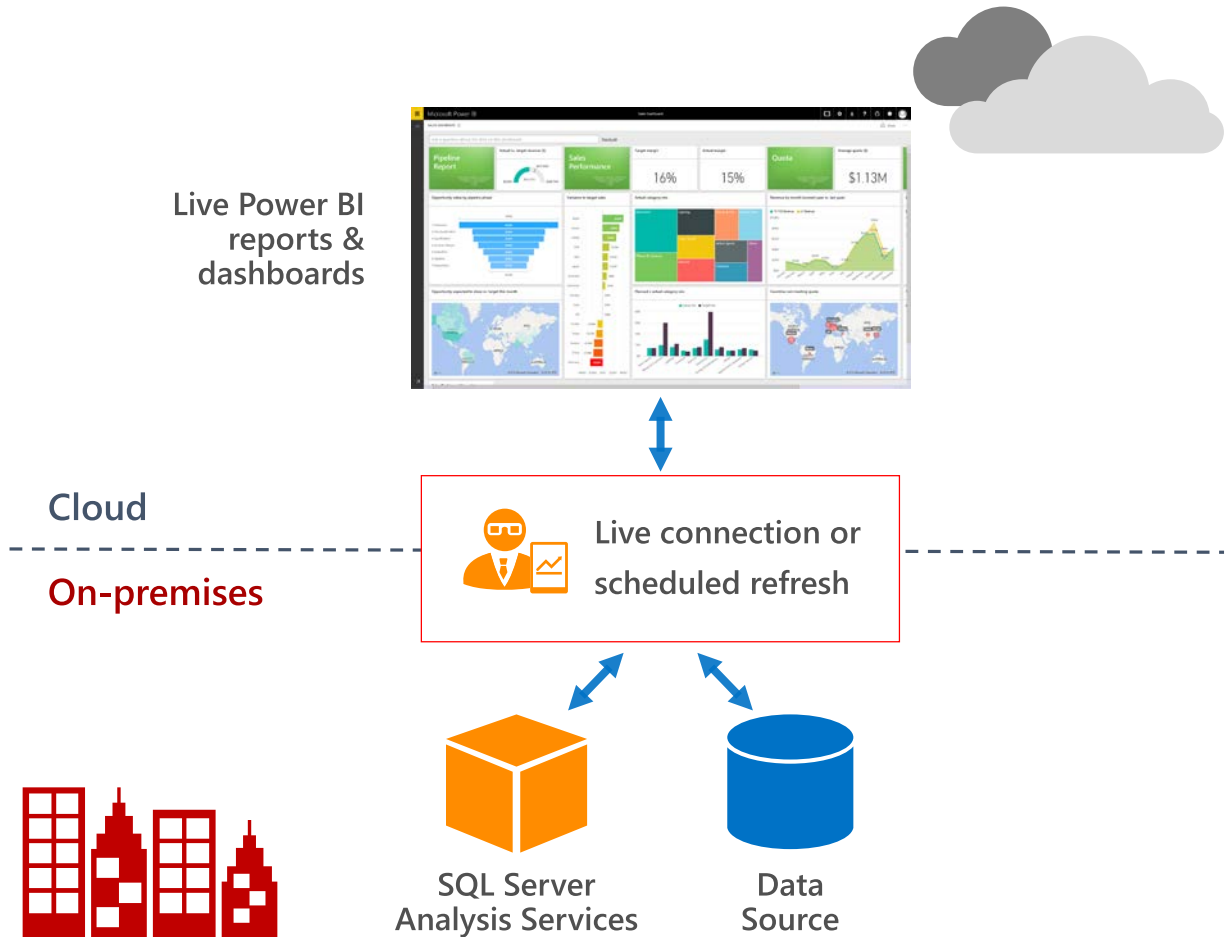

CULTURE

A PROCESS

SUCCESS IN DATA AND ANALYTICS

Deploy quickly with a **hybrid** solution

Access on-premises data any way you like

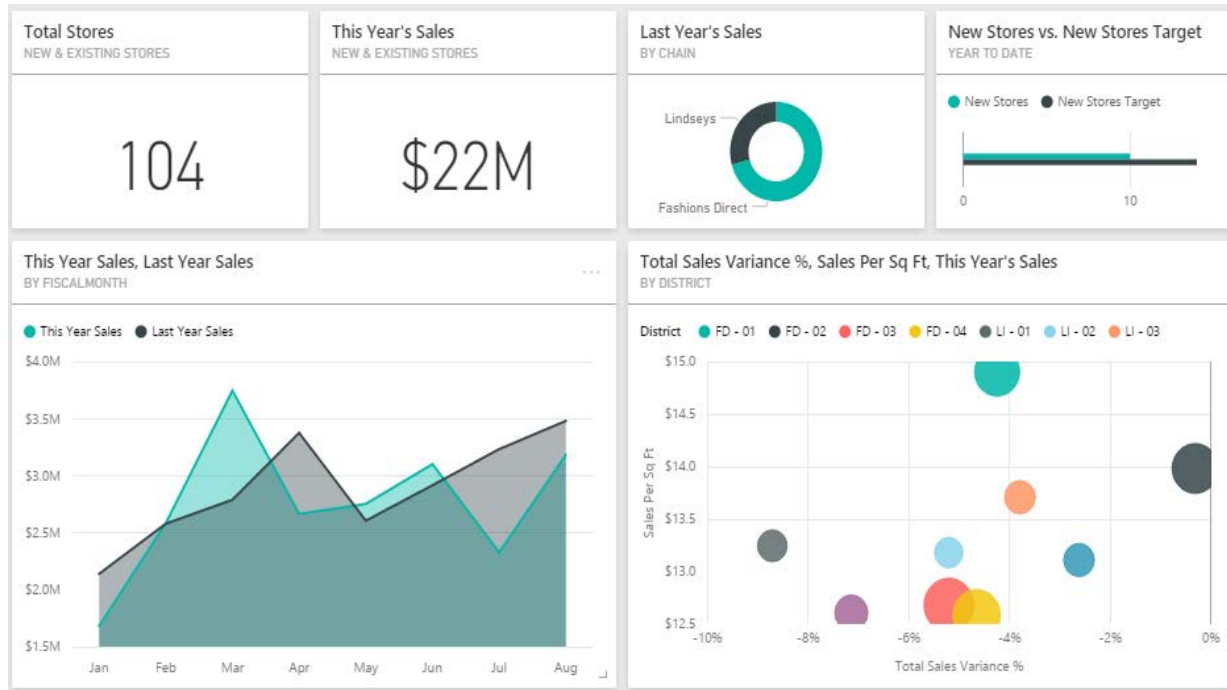

- ➔ Scheduled refresh
- ➔ Live connection

Connect to on-premises SQL Server Analysis Services models

- ➔ Tabular and multidimensional

Data Solutions

Business decision-making is an art based on information, not guesswork

"The Microsoft BI Solution provides a raft of tangible benefits to our business, but the real benefits are the intangible strategic benefits"
- Group Manager, Kennards Hire

Data warehouse and Business Intelligence Experts

Strategy & Roadmaps

Microsoft SQL Server*

Big Data

Data Warehousing (xDW)

Antares' DW Framework

Business Intelligence

Data Analytics

Self-Service Analytics

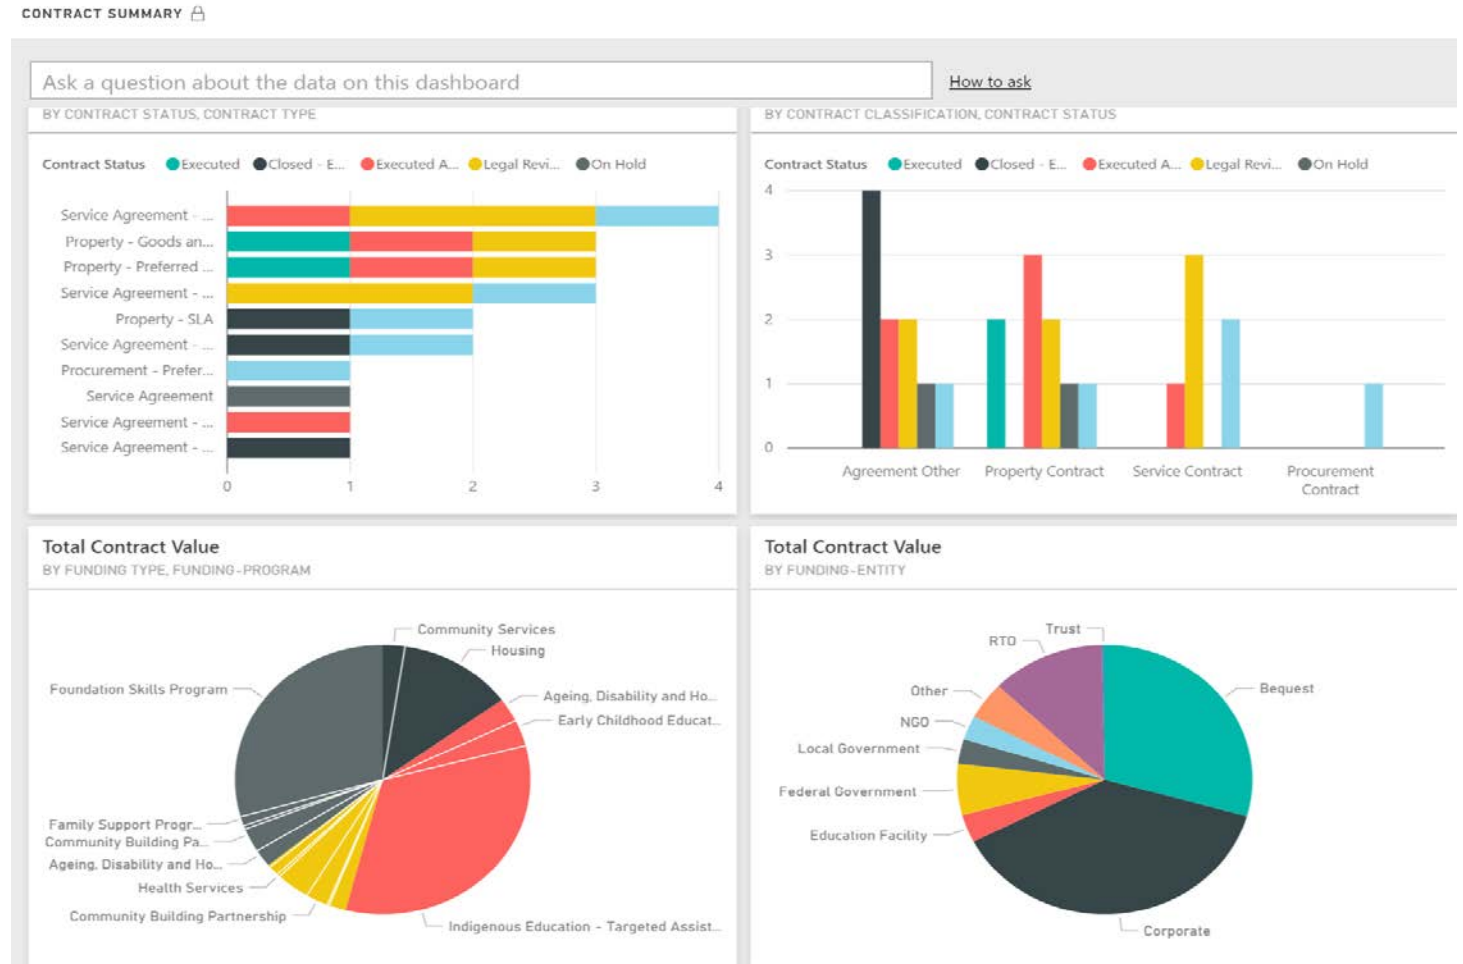

* As a Microsoft Gold Partner, Antares' implementations are based on, but not restricted to the Microsoft BI Toolset (SQL Server)

Some of the Benefits

5 day on-site Power BI workshop with key business stakeholders to enable powerful data insights:

- Reduce implementation times for reporting.
- Do it yourself, self-service BI.
- Share your valuable findings with others within your organisation.
- Create production-ready reports.

"You're sitting on a goldmine of data".

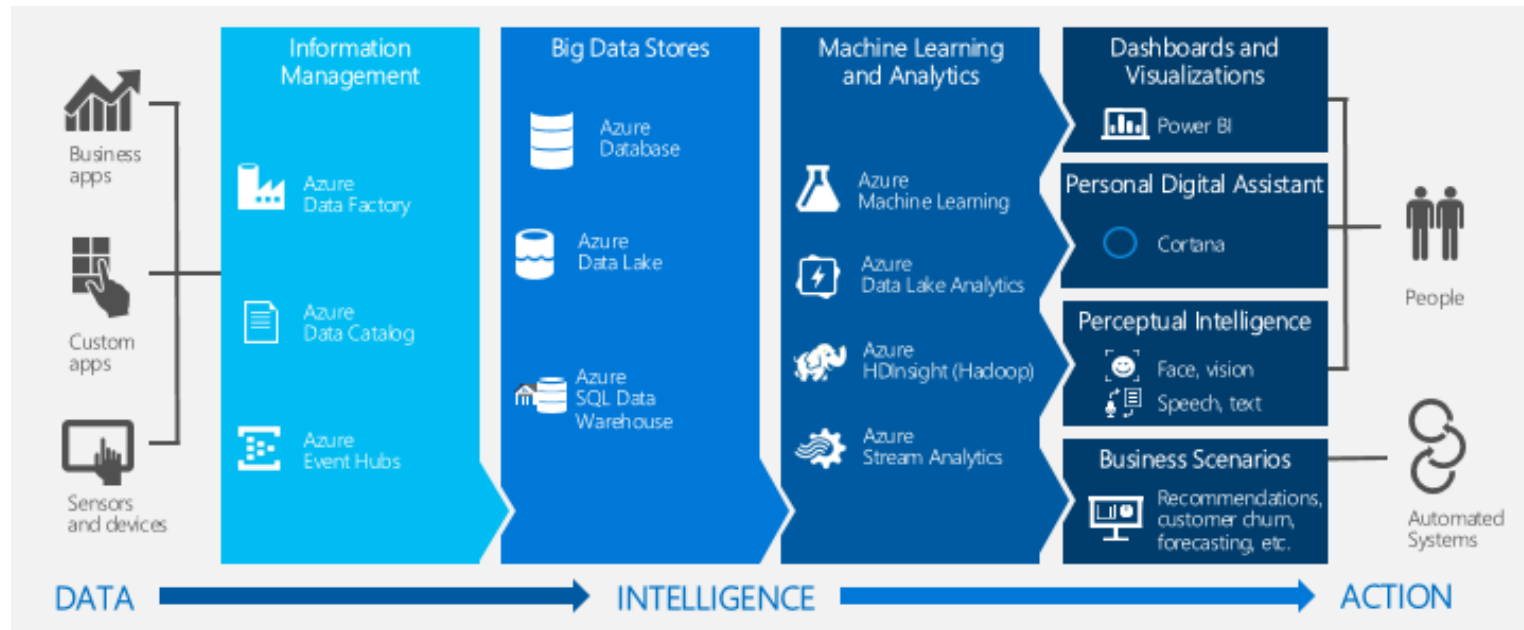

Azure Data Analytics Quick Start

*"You're sitting on a goldmine of data.
Now it is time to take actions".*

Some of the Benefits

10 day on-site workshop with key business stakeholders to enable powerful data insights:

- **Explore** new ways to store and process data.
- Get **value** from both **structured** and **un-structured** data.
- Use **Machine Learning** to gain understanding of your business and take effective actions.
- **Create** a production-ready data application.

A black and white photograph of three people in an office environment. On the left, a man with glasses and a mustache is smiling. In the center, a man with short dark hair is looking intently at a laptop screen. On the right, a woman is partially visible, also looking towards the laptop. The background shows office shelves and a window.

Technology is available for everyone.
Innovation happens when architecting the
solution is done in such a way that the produced
value makes our lives easier and us better.
